

Response Modality	
<u>Vocal:</u>	any sound made with the mouth
<u>Non-Vocal:</u>	physical actions
<u>Both:</u>	vocal and non-vocal responses that co-occur within 0.5 seconds of one another
Response Sensitivity	
<u>Sensitive:</u>	statements or actions directly relate to the dyadic interaction
<u>Redirective:</u>	direct attempt to bring attention to a different interaction or object
<u>Other:</u>	behaviors that are not sensitive or re-directive

Table 1. Caregiver responses to a previous infant turn were coded in two dimensions: response modality and response sensitivity.
